STANDARD SYSTEM

GLASS SYSTEMS ► FOLDING GLASS SYSTEMS

This is a successful architectural solution that integrates indoor comfort with an outdoor living space.

This stunning design concept has been intricately developed in order to fit with any type of architecture, classic or modern. It is a product that doesn't use aluminium profiles between the glass panels, and the aluminium used at the top and base of the panels can be painted in every colour including digital wood effect.

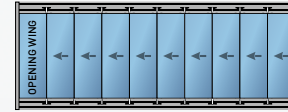

A delightful design line running throughout the product enables any colour combination so that it can be personalized to individual taste. The weight of the glass is shared equally between the top and bottom rail and between each pane of glass there is a special wind-block seal.

Due to the innovative suspension system each glass panel slides smoothly into place. The Inox locks ensure secure fastening of each panel in either the inside or outside position.

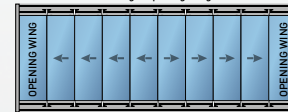

CONFIGURATIONS

Single opening wing

Double opening wing

DIMENSIONS

Max Height	240 cm
Max Width	600 cm
Max Wing Width	67 cm
Glass	8mm Tempered

OPTIONAL 02	Line Colour for All RAL Colours	37 €/m

Notes:

- This type of glass system is compatible with steel construction, not applicable to standard aluminum construction.

HANGING SYSTEM

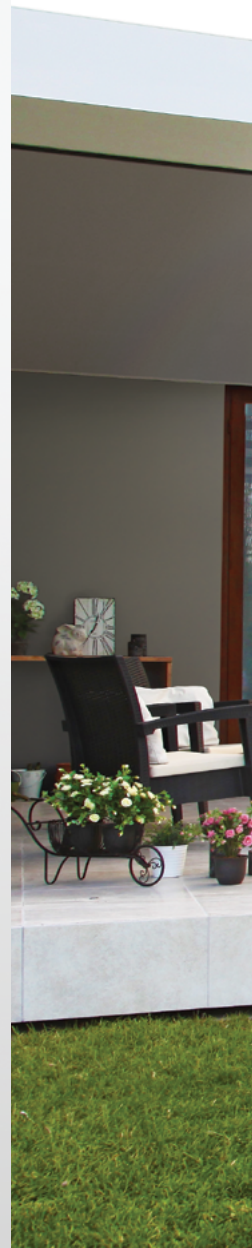

GLASS SYSTEMS ► FOLDING GLASS SYSTEMS

With its special frameless design the customer is able to enjoy the panoramic views around them, from within the enclosed area.

This clean cut Hanging System does not have any rail on the floor. With a specially designed joint system, that screws the glass directly to the profile providing extra strength and stability, the glass panels are moved safely only along the top rail. Along the bottom a special rubber seal prevents rain and air.

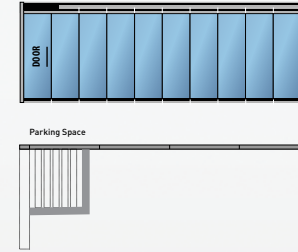

The first pane of glass can be installed as a lockable door and all the wings can be secured into place with the durable Inox locks. This wheel system has an intelligent parking technology where the pane of glass is guided into the right track by itself.

Wheels at the top of each panel are adjustable to ensure easy manoeuvring. Aluminium profiles can be painted in every colour, including digital wood effect and the top rail can be hidden directly into the ceiling for a cleaner finish.

BUTTERFLY SYSTEM

GLASS SYSTEMS ► FOLDING GLASS SYSTEMS

The butterfly system is carried along the top rail from a centrally placed wheel.

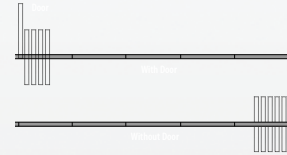

A joint system that screws the glass directly to the profile provides extra strength and stability. Along the bottom of the window pane there is a special rubber seal which prevents rain and air. Its first pane of glass can be installed as a lockable door and all wings can be secured into place with the durable Inox locks.

The wheel system at the top of each wing is adjustable to ensure easy manoeuvring of the panels. Completely transparent views enable a life intertwined with nature.

DOUBLE GLASS FOLDING SYSTEM

GLASS SYSTEMS ► FOLDING GLASS SYSTEMS

This protective and classy concept has been developed in order to provide maximum comfort to any living space.

With perfect water and heat insulation as well as being completely airtight it integrates indoor and outdoor living.

Each panel is enclosed with an aluminium frame and in turn connected to each other with strong

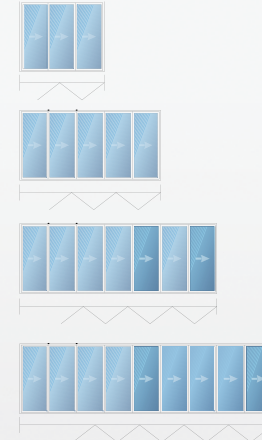

hinges. Small wheels along the top and bottom of the frame enables the panel to open and close in the accordion folding style.

The strength of this system enables it to carry heavy panels and the extra rubber surround makes the system completely air tight and waterproof.

3RAILED SLIDING SYSTEM

GLASS SYSTEMS ► SLIDING GLASS SYSTEMS

This stylish glass system is completely waterproof and with our specially designed drainage detail even the smallest of raindrops will be caught and guided out again.

A perfect product for any building, its adjustable wheels ensure smooth manoeuvring of each panel to both left and right. Each panel is connected to the other enabling easy opening and closing.

The tiny brushes between the 10mm glass prevents dust entering. Whether open or closed there is no loss of space with this system.

5 RAILED SLIDING SYSTEM

GLASS SYSTEMS ► SLIDING GLASS SYSTEMS

The 5 railed glass system is the perfect solution for large living areas that you want to maximize the use of.

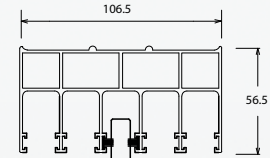

The adjustable wheels ensure smooth manoeuvring and each panel is connected to the other enabling easy opening and closing. Depending on the weather you can enjoy the benefits of Alfresco living when all panels are in the fully opened position, and secure the same comfort when closed again. Completely

waterproof and with our specially designed drainage detail even the smallest of raindrops will be caught and guided out again. The tiny brushes between the 10mm glass prevents dust entering.

DOUBLE GLASS SLIDING SYSTEM

GLASS SYSTEMS ► SLIDING GLASS SYSTEMS

Buildings where insulation solutions have been prioritized, offers great comfort to its users.

This is an indispensable complement to energy saving efforts. The specially designed wheel system ensures smooth manoeuvring of each panel to both left and right and the tiny brushes between the glass panels prevents dust and water entering.

With this solution you maximise the use of the natural heat that daylight provides.

LIFT AND SLIDE SYSTEM

GLASS SYSTEMS ► SLIDING GLASS SYSTEMS

When closed this system offers perfect water, wind, heat insulation and in addition to this the huge panels enable an unbroken panoramic view.

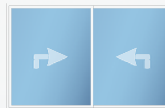

In order that the panels can be so big and the view unbroken, the system consists of a lifting mechanism that first lifts the panel and then

slides it. It is a very light weight system and slides very easily and smoothly without much effort.

SECTION SYSTEM

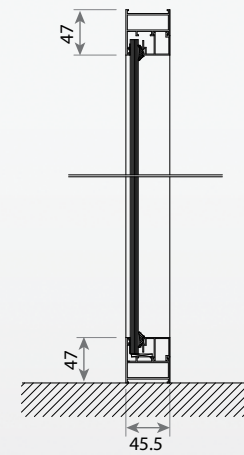

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

Dividing spaces with this section system creates a lighter and brighter atmosphere.

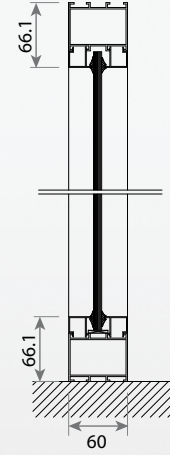

With numerous options, this way of architecture is a creative and stylish way to split up your working area. As well as different colour options, glass films with any text or design can be laminated directly onto the glass.

Frameless applications divide without excluding and provide a light, stylish and enjoyable area to work in.

ADJUSTABLE PARAPET SYSTEM

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

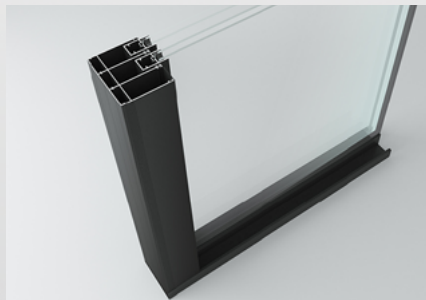

Operating vertically this parapet system can function interiorly as a room divider, and exteriorly as a balcony and wind breaker.

Due to the adjustable height ability of the panels this product can provide finely tuned sound, heat and water control. This product can be used with or without motor, and due to special

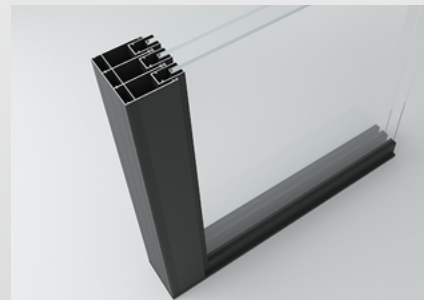

stabilizers; it can easily be set to the desired height without using much energy. Using the Motorized option can be operated by remote control.

PARAPET SYSTEM

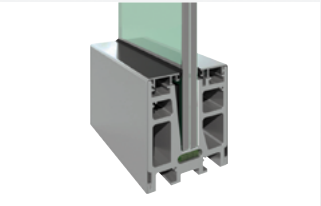

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

With its strong frameless panels the Parapet system provides uninterrupted views as well as a welcome wind shield too.

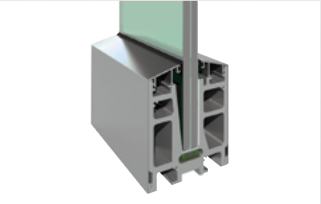

It is an ingenious form of glass fencing that can either be installed directly into the ground giving the appearance of the glass coming straight up from the earth or into a metal rail that runs along the bottom of the pane of glass.

SKY LIGHT SYSTEM

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

The Sky Light system is a special glass roof that allows you to make full use of the natural light.

Using alternative double glazed glass, this system minimizes heat loss from the roof and the different coloured glass options create a beautiful effect.

The system will be priced according to the architectural project.

GLASS DOOR

GLASS SYSTEMS ► DOOR SYSTEMS

This beautifully designed panoramic glass door is an elegant feature in many buildings.

Flooding a room with natural light it creates a seamless flow between your various living arrangements.

This sturdy, frameless door has a special mechanism to stay fast in either the open or closed position. Different accessories are available to apply directly to the glass door.

PHOTOCELL DOOR

GLASS SYSTEMS ► DOOR SYSTEMS

This clean cut and stylish door system operates with a photocell sensor.

It has two or four configurations and a versatile design which allows for flexible application in many different settings. It also applies an intelligent OCS safety system, meaning that if an obstruction is in the way, it steps in to prevent clipping the person or object.

Security and access control are installed at the top of the frame. At the same time as applying excellent weather sealing qualities the frames are also reduced to the maximum so as to promote visibility.
